Vöhringer

Why Gunnensen?

Established over 127 years ago, Gunnensen is the largest independent Australian owned distributor of wood-based panel products, timber and decorative surface materials in Australia.

The history of Gunnensen has been one of growth through product and technological innovation.

The company is committed to satisfying customer and supplier requirements, which are

delivered through an efficient nationwide distribution network. Through strong

relationships with industry associations and a vast customer base

Gunnensen continually develops products and services that

best fulfil the needs of the RV and Caravan industries.

REZILIENCE

Walls, Ceilings and Cabinetry

The Rezilience range of interior wall panelling is ideal for Caravans and Recreational Vehicles.

Rezilience utilises advances in technology to offer a hard wearing and highly stain resistant surface, creating a finish that surpasses the performance of standard wall panelling materials.

The Rezilience finish is so advanced that common marks and stains may be removed virtually without a trace. With such simple washability, Rezilience is ideal for compact living spaces and high wear areas.

Consisting of a plywood substrate with a decorative overlay, Rezilience is available in an attractive range of timbergrains and paint effects to suit both contemporary and traditional tastes in design.

REZILIENCE

● Vinyl White (Embossed)

Laminates

The inFORM range of high pressure laminates combines form and functionality and has been developed specifically for the Australian market.

inFORM is manufactured using BIO antibacterial technology making it the perfect choice for food preparation areas. The BIO additive in inFORM kills 99.9% of food poisoning bacteria such as salmonella and e-coli within 24 hours, reducing risks of cross-contamination for a safer and more hygienic surface.

inFORM is manufactured to exacting standards with built-in strength and flexibility. Solid colour sheets can be post-formed to a curved edge of just 8mm radius, a tighter radius than the 12mm industry standard.

From bright vibrant solids to soft gentle patterns, inFORM combines fashion and technology to offer you one of the most advanced, cost effective benchtop surface materials.

Established in 1921, Vohringer is recognised as a leader in European design and the manufacturing of furniture for the Caravan and Recreational Vehicle market.

Their innovation has challenged and revolutionised interior design conventions.

The Vohringer range of furniture is new to the Australian market and introduces a stylish curved alternative to current interior design. Made from lightweight plywood and utilising German technology and accuracy, Vohringer offers years of experience in the construction and fast assembly of interior furniture and is available in an attractive range of Resilience colours and patterns.

Stylish. Practical. Reliable.
Be inspired by Vohringer.
